STIKI METHOD PELLET ADDITIONS

We have introduced some new additions to our popular Stiki Method Pellet range! Joining the line up alongside our existing 2mm and 4mm versions are a 4mm version in all existing flavours in the range meaning Banoffee, Chocolate Orange, Krill & Squid, Salted Caramel and Power Scopex PLUS 2mm and 4mm versions of the brand new Marine Green flavour.

The use of bigger, 4mm pellets on the Method and Method style feeders has become increasingly popular in recent years with carp in commercial venues growing bigger than ever and wising up to regularly deployed tactics. With this in mind we felt it was the perfect time to make these additions giving anglers even more choice from their favourite flavours within the Sonubaits range.

HARD PELLETS

Without doubt the most effective modern-day commercial carp fishing tactic, hard pellet fishing has revolutionised how we target carp, F1's and many other species on commercial venues. With that in mind we wanted to introduce a no-nonsense grab and go range of hard pellets that can be emptied into a bait tub and produce the goods straight from the bag.

When it comes to hard pellet fishing, a dense, slow breakdown pellet is a must and we have further boosted Hard Pellets with the addition of our popular Absolute Fish Oil to aid attraction, increase consistency in sink rate as well as slow breakdown once they enter the water. Complimenting traditional pellets, each bag contains a sampling of red hookbaits an option that many top anglers recognise as a must have in their bait armoury.
